

Media Shield

Drastically reduce your origin footprint by inserting Fastly Media Shield behind your multi-CDN deployment. Simply configure your CDNs to use Media Shield as their origin, then configure Media Shield to point to your infrastructure.

Significantly reduce your origin traffic

- ✓ Lower Infrastructure and Egress Costs
- ✓ Improved Streaming Reliability
- ✓ Holistic Visibility with Origin Insights

Fastly Media Shield enables streaming services to optimize multi-CDN workflows, significantly reducing traffic to origin infrastructure and cutting costs. By leveraging features like origin shielding, request collapsing, and edge caching, Media Shield ensures superior performance while minimizing latency for viewers across the globe. Extend functionality with Origin Insights for real-time traffic observability.

"Thanks to Media Shield, we have managed to reduce the cost of access to origin by 60%."

— **Carlos Santos**, Video Platform Manager at [Atresmedia](https://www.atresmedia.com)

Lower Infrastructure and Egress Costs

Reduce your streaming service's server load and overhead costs.

Improved Streaming Reliability

Enhance performance with faster startup times and consistent playback.

Holistic Visibility with Origin Insights

Monitor and troubleshoot critical events with accuracy and real-time data insights.
