

On-the-Fly Packager

Store one file and dynamically package and deliver the right version when requested, reducing costs and saving time, all while providing a better experience. We only package what users request, so you deliver only what is wanted.

Dynamically package on-demand video content in real time

- ✓ Cost-Effective, Real-Time Packaging
- ✓ Personalized and Flexible Content Delivery
- ✓ Improved Workflows with Broad Compatibility

Fastly's On-the-Fly Packager dynamically packages video content into the requested format in real time. By eliminating the need for pre-packaging and storing multiple versions of content, OTFP reduces storage costs, simplifies workflows, and enhances flexibility for delivery across streaming protocols like HLS and MPEG-DASH. It supports resolutions from SD to UHD 4K, DRM integrations, dynamic ad insertion, and multi-language subtitle handling for comprehensive streaming needs.

Cost-Effective, Real-Time Packaging

Minimize storage costs by dynamically generating only what is needed for streaming protocols.

Personalized and Flexible Content Delivery

Offer a personalized viewing experience by tailoring streams to devices, network conditions, and resolutions on demand.

Improved Workflows with Broad Compatibility

Simplify workflows and integration with leading content security and ad insertion solutions for efficient media delivery.
